## Best of RSNA 2010: First of its kind imaging device, affordable DR, pioneering imaging suites

**December 03, 2010**

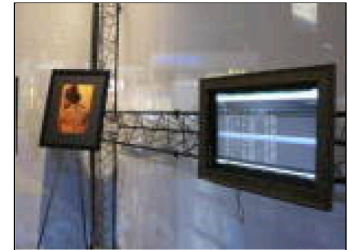

by **Olga Deshchenko**, DOTmed News Reporter

*The Radiological Society of North America's  
annual meeting at McCormick Place in Chicago*

*is one of the biggest medical shows in the*

*world. This year, RSNA says 21,688 exhibitors staffed booths in three  
sprawling halls at the convention center. For those who couldn't attend –  
or who did attend but couldn't see it all – DOTmed News presents, hall by  
hall, some of the most exciting gadgets, devices and applications.*

*Welcome to South Hall.*

### **Kjaya Medical, LLC**

Stamford, Conn.-based Kjaya Medical debuted the VoXcell imaging suite, a cloud-based solution with complete RIS, PACS, image archiving, communication capabilities and a range of advanced visualization tools. The suite's 3D/4D processing enables users to view high volume

3D/4D reconstructed images faster than when using conventional PACS and 3D processing solutions -- a 4D 320-slice CT scan output of 6,700 images is displayed in seconds. Users pay a one-time per-study fee, and those who'd like to try it out first can register for a free 30-day trial online.
